# Common Problems in Managing Performance

## TOP MANAGEMENT

- LACK OF PERFORMANCE ALIGNMENT TO COMPANY STRATEGY AND CULTURE

## LINE MANAGERS

- SUBJECTIVE PERFORMANCE RATINGS
- LACK OF PERFORMANCE EVIDENCE

## EMPLOYEES

- WELLBEING IS UNDERMINED
- IMBALANCE WORKLOAD
- UNFAIR PERFORMANCE RATINGS

## HR

- LACK OF FEEDBACK AND RECOGNITION TOOLS
- TOO MUCH PAPERWORK

# How do you manage performance remotely then?

# What are the pre-requisite of an effective remote performance management?

1. **Performance standard**, objectives and deliverables / performance expectation
2. **Coaching** and disciplined / regular interaction between manager and direct reports to ensure trust and empowerment
3. **Playbook** / Guidelines on remote working standard and process
4. **Development** on skills and mental readiness on remote working for all employees and managers
5. **Technology** infrastructure to ease connectivity, team collaboration, gather data, track and measure productivity

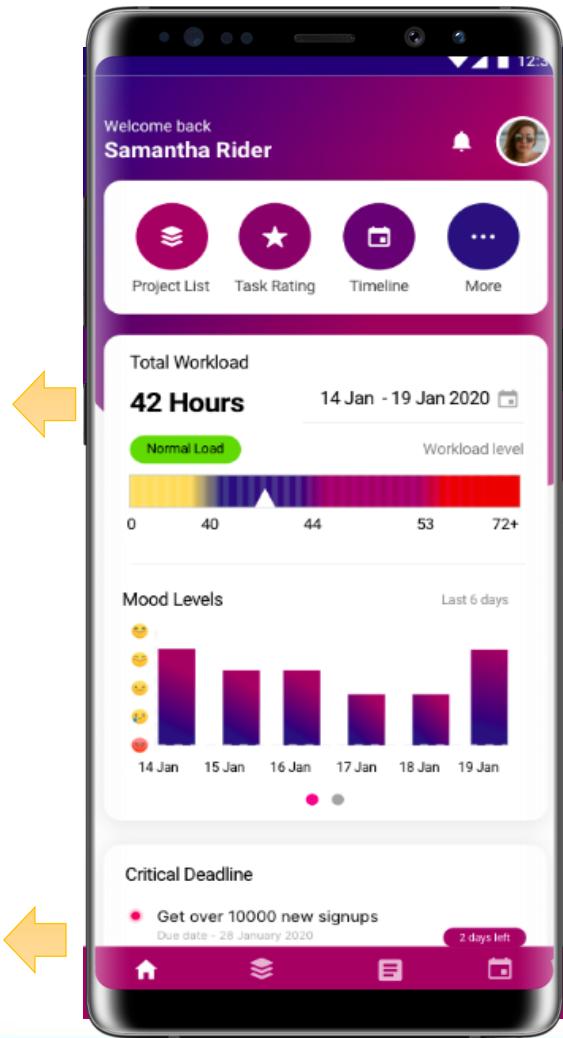

Having a tool such that provides a ***real-time-task-based review***, where everyone can give feedback at ***anytime and anywhere*** will help management, managers, employees to be more productive and grow.

Most importantly it is the **discipline** managers have to **coach and engage** with their team members.

Company needs to transform into new way of working during the pandemic, and technology plays important role on this matters.

- 2 Monitor their productivity.  
Are they overloaded, optimal or underloaded?
- 4 Most importantly: Trust and constantly engage through coaching and feedback

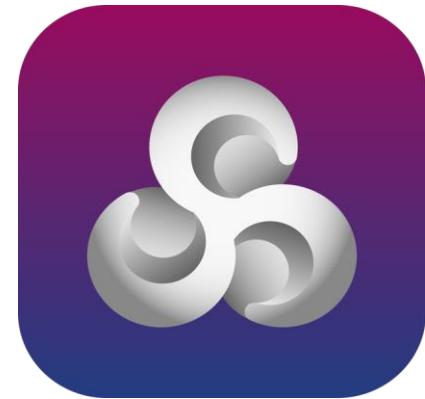

1 Ensure that your employees are delivering targets as requested

Be aware that your employees are healthy (mentally and physically) while working.

Welcome to  
the New Era of  
Productivity  
from anywhere
